

**Name: Kashish Paresh Kothari**

**Mean Reward Reached : 10.03**

**Plot of Mean Evaluation Reward: (Add Here)**

until last checkpoint to save the graph it reach till 9 but later as soon as it reached 10 there was system.exit hence graph did'nt save the mean score of 10. Please check python notebook for verification.

**Uploaded Saved DQN Model on Compass : yes**

**Uploaded your Agent.py file on Compass : yes**

**Any Extra Credit:**

1. What games did you apply the extra credit to?
2. What other algorithm did you use? Explain and cite all your sources. Any issues you got in training your new algorithm.
